

REAL BITSTREAMS · FROZEN INTERIM MODELS

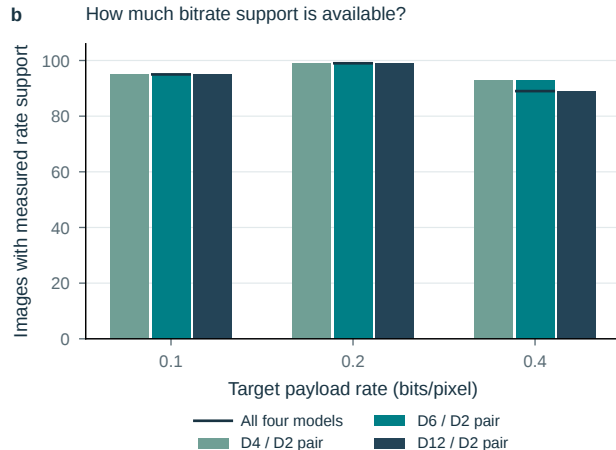

—●— D2 · epoch 20 —■— D4 · epoch 20 —▲— D6 · epoch 20 —◆— D12 released

100 DIV2K centre crops · CPU FP32 · D12 has different training provenance · paired-image 95% intervals

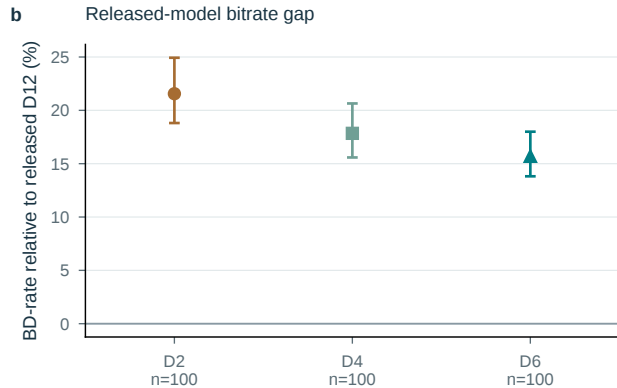

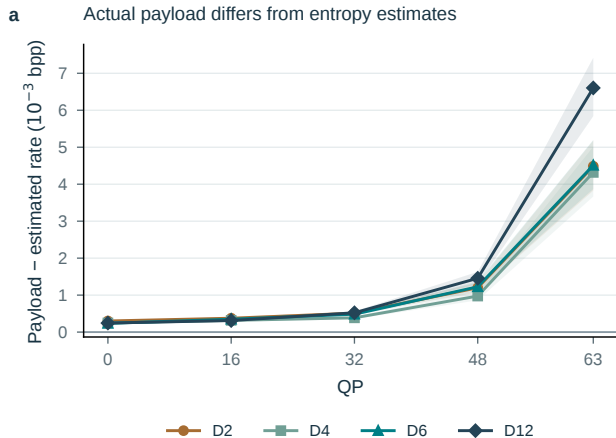

VALIDATION COVERAGE · NO EXTRAPOLATION

Means use common supported images · no interval estimated for the four-crop subset · cohorts vary with bitrate

RATE ACCOUNTING · PAYLOAD IS THE MEASURED QUANTITY

Header excluded · BD-rate uses each image's four-model common PSNR interval · interim vs released comparison
