

a Independent codecs · Kodak24**b Equal-quality coding penalty****c Shared early exit · CTC first frames****d Rate-computation trade-off**

Top: final Kodak24; entropy-estimated bpp, no emitted bytes. Bottom: 51 CTC sequences, e15 rANS latent payload only; mode-map/control bits excluded. BD-rate: per-image/sequence PCHIP over shared PSNR support; points are means, bars 95% paired bootstrap. The two rows are not a common benchmark.
