

CAUSAL DECODE · CORRECTNESS BEFORE PERFORMANCE

CPU FP32 research format · epoch20 D2/D4/D6 and released D12 · no CUDA compatibility or latency claim

a Only decoded information enters the next stage

Checkpoint + QP provide the fixed starting state.

PROCESS BOUNDARY

FUFREF1 stream

Encoder

88-byte header

rANS payload

Isolated decoder

b 36 fresh-process checks, all exact

Equal reconstruction, latents and coder indexes
Official FP32 forward parity also checked

Model identity checked · source analysis disabled
