

a

Actual payload rate–distortion

**b**

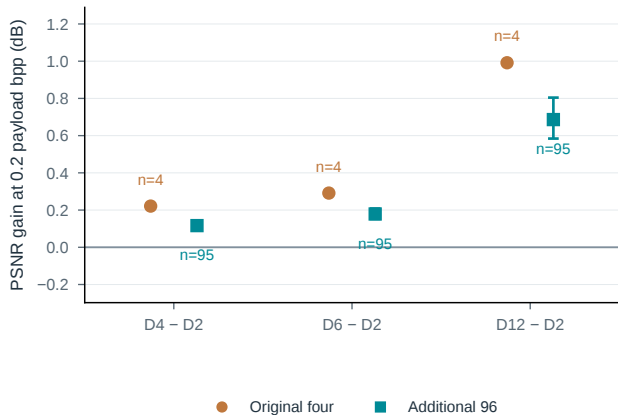

Paired gain at the same payload rate

—●— D2 · epoch 20 —■— D4 · epoch 20 —▲— D6 · epoch 20 —◆— D12 released

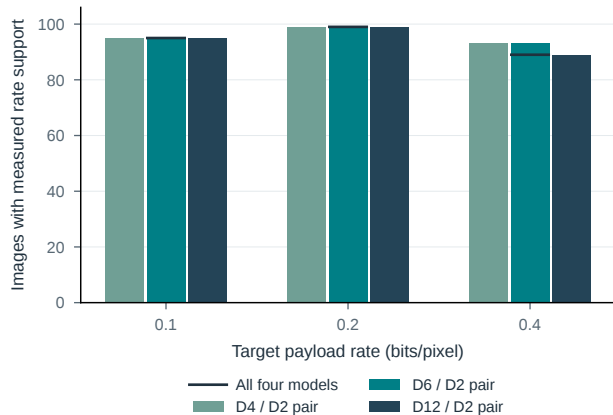

100 DIV2K centre crops · CPU FP32 · D12 has different training provenance · paired-image 95% intervals

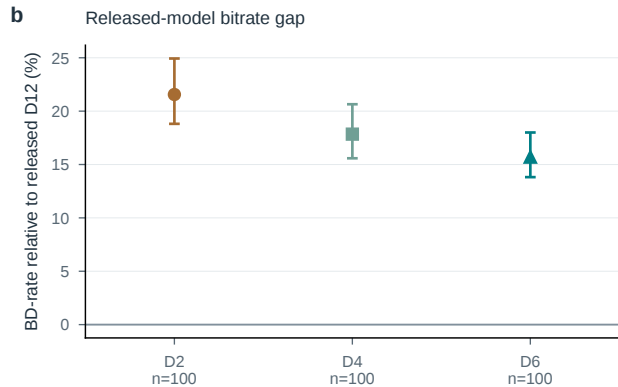

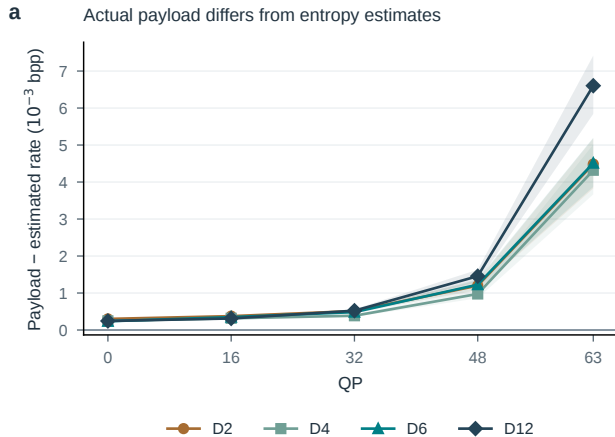

a Does the four-crop monitor represent the cohort?

Means use common supported images · no interval estimated for the four-crop subset · cohorts vary with bitrate

b How much bitrate support is available?

Header excluded · BD-rate uses each image's four-model common PSNR interval · interim vs released comparison
